Evidence captured Sep 1, 2026

Example Brand

example.invalid

Example Brand scores 62 out of 100, up 7 points on the last comparable scan. AI tools can reach the site, but key service details are hard for them to extract and there is no llms.txt. The three fixes below are worth the most points.

Current AISO score

↑ 7

Grade C

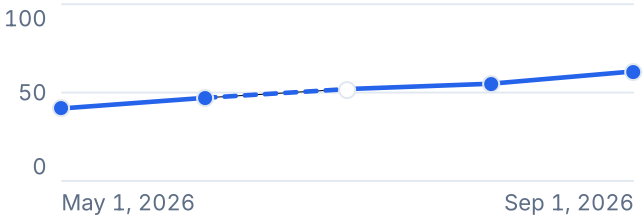

Measured change from the closest eligible scan: +7

Compared with the scan on Aug 1, 2026

2 checks improved · 0 regressed

Score over time

41 → 62

Dashed line: collected a different way from the scan before, so that move may reflect the method rather than the site.

Top 3 fixes

1 Review readable page content

Content Extractability: the scan found this check failing.

Next step: Locate key customer answers and verify that they appear in the page HTML.

Expected impact: High

2 Review the website summary for tools

llms.txt Present: the scan found this check failing.

Next step: Prepare a concise site summary with links to relevant public content if your tools use llms.txt.

Expected impact: High

3 Review structured content information

Structured Data: the scan found this check needs work.

Next step: Locate relevant content and validate that any structured markup accurately describes it.

Expected impact: Medium

Methodology and coverage: Invented for illustration: no website was scanned. A live report states the scan coverage, the pages collected and whether earlier scans were collected the same way.
